- Develop and deliver a strategic technological vision and direction for the organization
- Lead Software Development according to the needs of the organization
- Communicate and work effectively with the management

- Effective Team building
- Effective team utilization; implementing mechanisms to monitor, manage and provide progress on all software development activities
- Identify and implement technology trends
- Ensure maintenance of the technology standards and best practices
- Research the external environment, case studies and leading-edge technologies and where appropriate identify and recommend external partners for the delivery of best in class technologies suitable for organization's applications and requirements
- Lead all IT related projects of the company and ensures timely delivery at maximum profit and minimum resource utilization.
- Supervise, Designing, provisioning and managing big data infrastructure according to the needs of the PPIC3 organization
- Leading engineering, database administration, applications, networking and user support teams to ensure the secure and reliable operation of the data infrastructure according to relevant standards and service levels
- Leading, planning and conducting data analysis to create insights of value to the organization
- Coaching others in use of the infrastructure
- Monitoring performance through available dashboards and deriving value from different data sources.
- Supporting the procurement of additional data services as and when required by the PPIC3 center
- Lead team to process unstructured data into a form suitable for analysis – and then do the analysis.
- Lead team to monitor performance and advising any necessary infrastructure changes
- Developing policies to maintain the confidentiality of sensitive data.
- Supervising the designing and implementation of “supply, installation, testing, commissioning, training, maintenance & support of citywide command and control systems” through experts
- Ensuring the establishment of all the services related to Punjab Police Integrated Command, Control and Communication Centres (PPIC3) of

different cities in the form of Video surveillance, Integrated data & voice communication platform for telephone and radio communications, Traffic management (ANPR, ITMS, E-Ticketing, VMS etc.), Call Centre, Response management through dispatch system GPS-enabled vehicles, Automatic Vehicle Location System, Data centre and disaster recovery centre, Networking for provision of redundant connectivity links

- Ensuring that during the establishment of the IC3 Centers, provisions are made to make it possible for the Centre to have appropriate data, information and information systems to support its operations and deliver services
- Ensuring the provision of technical capability to provide support and maintenance for all the IC3 technologies
- Working with the technical staff and consultants to ensure that The Network Operation Centre (NOC) is providing a centralized, enterprise-wide service to manage the IT systems deployed at the IC3 and across the PP
- Reporting any violation of SOPs/Rules/Laws to Chief Operating Officer/Managing Director and activate accountability mechanism

4. PROFILE OF CONSULTANT
